

Dear ladies and gentlemen,

We would like to express our gratitude for the opportunity to potentially serve you as our clients!

The project "Sustainable Nutrition and Supported Employment Center "Credo" is an initiative of Academica-VUM Ltd., with its main founder being the Varna University of Management with the support of the Agency for People with Disabilities at the Ministry of Labour and Social Policy. This project is a pilot program for the entire country, with the Center at Academica-VUM being the second of its kind in Bulgaria.

At the core of the company's concept lies a comprehensive sustainable presence in public life, including environmentally conscious resource consumption, social engagement, and providing opportunities for full participation of individuals in disadvantaged positions. The center, functioning as a fast-food establishment and catering service provider, employs 15 individuals with various permanent disabilities, predominantly mental disabilities. An adapted and protected workplace has been created for them to ensure sustainable employment conditions, improve their quality of life, and overcome social isolation through the development of their professional skills.

**Through your support and social engagement, you become part of this cause and our allies.**

Thank you!
